How to use this guide

1. **One step per page** — large screenshot of the real product, with the important button outlined in orange.
2. **Read the goal** — why this screen exists.
3. **Follow the numbered actions** on a computer, tablet, or phone browser (or Android / Windows app).
4. **Do not skip Settings tax + Menu GST** before live sales.
5. **Stuck?** Email support@codearc.co.in with your Outlet ID and the step number (e.g. Step 10).

Demo login used for screenshots

Outlet ID example: your workspace code · Staff get their own usernames under Employees.

Phases in this book

- 1 Find RestroSuite online
- 2 Register & sign in
- 3 Workspace shell
- 4–9 Sell, floor, QR, kitchen, bills
- 10–16 Stock, menu, team, CRM, tax, reports, growth
- 17 Settings (profile, tax toggles, print, WhatsApp)
- 18–19 End of day & support

Search for CodeArc RestroSuite on Google

Goal: A new owner finds the official product without a salesperson.

Tips & warnings

- Bookmark the site for staff. Prefer restrosuite.codearc.co.in.

Homepage — product promise

Goal: Understand offline POS, WhatsApp bills, QR ordering, kitchen display, free launch.

The screenshot shows the RestroSuite homepage. The main headline is "Run the floor, kitchen, and bills from one clear console." Below it, a sub-headline states: "RestroSuite is an offline-first POS with kitchen display, WhatsApp receipts, and QR table ordering. Start free on the phone or laptop you already use — no hardware purchase required." There are two buttons: "Create free outlet" and "See how it works". Below these are three icons with text: "Owner-approved reviews", "Free to start", and "Offline billing".

The right side of the page features a large section titled "Live • one console" showing a demo of the RestroSuite interface. It includes a "POS Cart • Table 7" with items like Masala Dosa, Filter Coffee, and Vada, a "Kitchen Display" showing orders for Table 7, a "Floor Plan • Level 1" showing table status (Free, Occupied), and a "Bills • Today" table. A smartphone mockup shows a WhatsApp receipt for RestroSuite. At the bottom of this section, it says "One console • POS → Kitchen → Floor → Bills → WhatsApp" and "Live • animated sync".

At the bottom of the page, there is a section titled "TRUSTED BY INDEPENDENT CAFES, CLOUD KITCHENS & FRANCHISES" with logos for The Spice Bistro, Cafe Boho, Urban Tandoor, Brew & Co, Masala House, and Pixel Pizza.

Register a new outlet — every field — what every control does

Rule: Every visible button, toggle, field, and chip on this screen is listed below — what it is for, what happens when you use it, and what screen/state comes next. If you can see it, it is covered.

Why this screen exists: Create workspace: business name, Outlet ID, owner contact, password, country & currency.

WALKTHROUGH (DO THIS IN ORDER)

1. Click Register outlet.
2. Business / restaurant display name (shown on bills and QR cards).
3. Workspace code / Outlet ID — short slug e.g. royal-dhaba (letters, numbers, hyphens). NOT the display name. Staff type this every day.
4. Owner WhatsApp / phone and email (recovery + support).
5. Country and currency (tax label GST/VAT and ₹ / € symbols).
6. Business type if shown (Restaurant / retail / etc.) — set at registration.
7. Password 10+ characters + confirm. Complete OTP if shown.
8. Submit Create my outlet → wait for success → Sign in with the new Outlet ID.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Business name	Bill header	Stores display name	Next fields
Outlet ID / slug	Daily login key	Creates tenant code	Must write down
Phone / email	Recovery + support	Saves contacts	OTP if enabled
Country / currency	Tax + symbols	Defaults tax pack	GST/₹ etc.
Password + confirm	Owner security	Hashes password	Create outlet
Create my outlet	Provision cloud	Creates workspace	Sign in with new ID

Tips & warnings

- Write down Outlet ID + owner username + password.
- Never share the owner password on the floor — create staff logins under Employees.

Sign in — Outlet ID, user, password

Goal: Enter an existing outlet with staff or owner credentials.

Desktop web view (1440×900) · orange outline = focus control

Sign in — Outlet ID, user, password — what every control does

Rule: Every visible button, toggle, field, and chip on this screen is listed below — what it is for, what happens when you use it, and what screen/state comes next. If you can see it, it is covered.

Why this screen exists: Enter an existing outlet with staff or owner credentials.

WALKTHROUGH (DO THIS IN ORDER)

1. Open Sign in tab.
2. Workspace / Outlet ID: e.g. bbb (registration code, not restaurant name).
3. Email or Username: staff or owner username.
4. Password.
5. Optional: Keep me signed in — only on trusted devices.
6. Click Sign in securely → lands on Point of Sale.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Outlet ID	Which database	Scopes session	Must match registration
Username	Which person	Loads role tabs	Owner vs cashier menus differ
Password	Prove identity	Validates	Dashboard
Keep me signed in	Trusted device	Remember-me	Skip retype next visit
Sign in securely	Enter console	Redirect dashboard	POS

Tips & warnings

- Wrong Outlet ID is the #1 login error.
- Role (cashier / kitchen / waiter / manager / owner) controls which tabs appear after login.

Forgot password / Recover access

Goal: Reset owner/staff password when locked out.

POS home — menu grid + cart shell — what every control does

Rule: Every visible button, toggle, field, and chip on this screen is listed below — what it is for, what happens when you use it, and what screen/state comes next. If you can see it, it is covered.

Why this screen exists: Sell takeaway, dine-in, or delivery from one counter screen.

WALKTHROUGH (DO THIS IN ORDER)

1. Open Point of Sale (default after login).
2. Menu search box filters by name or item code.
3. Category chips filter the grid; sort and +/- card size adjust layout.
4. Tap a tile to add a line to the cart.
5. Cart shows lines, subtotal, tax, grand total.
6. Right panel cart is always visible on desktop.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Menu search box	Find item by name/code in rush	Filters grid live	Matching tiles only
Holds button (menu bar)	Open parked orders list	Shows held carts count	Resume or delete a hold
Sort control	Order tiles A–Z / popular / etc.	Reorders grid	Same items, new order
Card size – (btn-grid-dec)	Smaller tiles	More items on screen	Same menu
Card size + (btn-grid-inc)	Larger tiles	Easier tapping	Same menu
Category chips (All / Staples / ...)	Browse one section	Filters by category	Only that category

Customer on the bill — Walk-in vs named guest

Goal: Link name + phone for WhatsApp bills, CRM, Due credit, and loyalty.

The screenshot displays the CODEARC RestroSuite POS interface. The sidebar on the left contains navigation options under 'OPERATIONS' (Point of Sale, QR Orders, Kitchen, Floor & Tables, Online Orders, Bills) and 'MANAGE' (Kitchen Setup, Inventory, Menu Editor, Employees, Customers, Tax & GST). The main area is titled 'Point of Sale' and shows a 'POS Seating Layout - Select Table' grid with 14 tables (Table 01 to Table 14), each with 4 seats and 'Available' status. The right-hand panel shows the 'Order' screen with a search bar, a 'Holds (1)' button, and a section for adding customer details. The 'Add details' section is highlighted with an orange outline, showing fields for 'Name' and '10-digit mobile' (with a dropdown for 'IN +91'). Below this, the 'Cart is empty' message is displayed. The bottom of the screen shows the 'Sub ₹0' and 'GST ₹0' amounts, and a 'Total' amount of '₹0'.

Desktop web view (1440×900) · orange outline = focus control

Customer on the bill — Walk-in vs named guest — what every control does

Rule: Every visible button, toggle, field, and chip on this screen is listed below — what it is for, what happens when you use it, and what screen/state comes next. If you can see it, it is covered.

Why this screen exists: Link name + phone for WhatsApp bills, CRM, Due credit, and loyalty.

WALKTHROUGH (DO THIS IN ORDER)

1. Cart customer toggle starts as Walk-in.
2. Expand Add customer — enter name and mobile.
3. Phone is required for WhatsApp PDF after settle and for Due (credit) sales.
4. If guest already exists in Customers, dues banner may show outstanding balance.
5. Customer profiles also auto-build when you bill with a phone number.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Walk-in / Add customer toggle	Anonymous vs named	Expands name+phone fields	Enter guest details
Customer name field	Print on bill / CRM	Stores name	Bill header & CRM
Customer phone field	WhatsApp + CRM key	Stores mobile	WA bill + dues lookup
Customer dropdown (if shown)	Pick existing	Links known guest	History/dues load
Dues banner	Outstanding credit warning	Shows balance	Collect or use Due carefully

Tips, promo codes, and more cart options

Goal: Apply optional tip and coupon before payment.

The screenshot displays the CODEARC RestroSuite Point of Sale interface. The left sidebar contains navigation options under 'OPERATIONS' (Point of Sale, QR Orders, Kitchen, Floor & Tables, Online Orders, Bills) and 'MANAGE' (Kitchen Setup, Inventory, Menu Editor, Employees, Customers, Tax & GST). The 'Point of Sale' section is active, showing a 'Counter 1' and 'Ring up takeaway & dine-in orders'. The main area features a 'POS Seating Layout - Select Table' grid with 14 tables (01-14), each with 4 seats and 'Available' status. A legend indicates 'Free' (green dot), 'Occupied' (orange dot), and 'Billed' (blue dot). The right sidebar shows an 'Order' panel with a search bar, a 'Holds (1)' button, and a 'Cart is empty' message. The bottom of the screen shows a summary: Sub ₹0, GST ₹0, Total ₹0, and a 'Tap menu items' button.

Desktop web view (1440×900) · orange outline = focus control

Tips, promo codes, and more cart options — what every control does

Rule: Every visible button, toggle, field, and chip on this screen is listed below — what it is for, what happens when you use it, and what screen/state comes next. If you can see it, it is covered.

Why this screen exists: Apply optional tip and coupon before payment.

WALKTHROUGH (DO THIS IN ORDER)

1. Open More options / cart details accordion if collapsed.
2. Tip: No tip · 5% · 10% (or custom if shown).
3. Promo code: type code → Apply; Clear removes it; badge shows active offer.
4. Discount controls (if role allows) reduce subtotal before tax.
5. Tax lines follow Settings (calculate tax) + per-item GST slab from Menu Editor.

Hold order and Send KOT — what every control does

Rule: Every visible button, toggle, field, and chip on this screen is listed below — what it is for, what happens when you use it, and what screen/state comes next. If you can see it, it is covered.

Why this screen exists: Park a cart for later or fire kitchen tickets without settling cash yet.

WALKTHROUGH (DO THIS IN ORDER)

1. Hold — saves the current cart as a held order (resume later from Holds list).
2. Right-click / long-press Hold (desktop) often opens the held-orders list.
3. KOT — Send kitchen ticket to KDS without Print & Pay (cooks start prep).
4. After KOT, you can still add items and settle later.
5. Holds counter on the menu bar shows how many parked orders exist.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Hold (btn-hold-current)	Park cart for later	Saves held order	Cart may clear; resume from Holds
Holds list (right-click / Holds button)	Find parked orders	Lists holds	Resume or discard
KOT (btn-kot)	Fire kitchen without pay	Sends ticket to KDS	Cooks see items; cart can stay open
Held count badge	How many parked	Display only	Open Holds list

Tips & warnings

- Dine-in tables also show held state on Floor & Tables.

Payment methods and Print & Pay

Goal: Collect money and finish the bill cleanly.

The screenshot displays the CODEARC RestroSuite POS interface. The top bar shows the user is logged in as 'Bbb' (Big Bites Ballymahon - Admin) and the current time is 10:04 am. The main area is titled 'Point of Sale' and shows a grid of 14 tables, each with 4 seats and marked as 'Available'. The right panel shows the 'Order' screen with a 'Cart is empty' message and a 'Total' of ₹0. The bottom status bar indicates the desktop web view (1440x900) and that the orange outline represents focus control.

Desktop web view (1440x900) · orange outline = focus control

Payment methods and Print & Pay — what every control does

Rule: Every visible button, toggle, field, and chip on this screen is listed below — what it is for, what happens when you use it, and what screen/state comes next. If you can see it, it is covered.

Why this screen exists: Collect money and finish the bill cleanly.

WALKTHROUGH (DO THIS IN ORDER)

1. Check subtotal, tax, tip, promo, grand total.
2. Cash — optional cash received + denomination shortcuts; change due shows.
3. UPI — mark counter UPI collected.
4. Card — card machine tender.
5. Due — credit sale; requires customer; increases CRM dues.
6. Split — allocate across Cash / UPI / Card / Due with rest-to and half helpers.
7. Print & Pay — creates paid bill, deducts recipe stock if linked, may fire KOT, opens settled modal.
8. On settled: thermal print, WhatsApp PDF, or close.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Cash tender	Cash drawer sale	Selects Cash method	Optional cash-received UI
UPI tender	UPI / QR counter pay	Selects UPI	Settle as UPI
Card tender	Card machine	Selects Card	Settle as Card
Due tender	Credit / tab	Selects Due — needs customer	CRM dues increase
Split tender	Multi-pay one bill	Opens split amounts	Allocate Cash/UPI/Card/Due
Cash received / change UI	Count notes	Shows change due	Print & Pay
Print & Pay (btn-checkout)	Finish sale	Creates paid bill, stock deduct, print/WA options	Bill settled modal
Settled: Print thermal	Paper receipt	Sends to printer/bridge	Physical bill
Settled: WhatsApp PDF	Digital bill	Queues gateway send	Guest phone
Settled: Close	Back to next order	Closes modal	Empty POS cart

Tips & warnings

- Never use Due for anonymous walk-in — attach a phone first.

Split tender and cash denominations

Goal: Handle multi-tender and exact cash quickly.

The screenshot displays the CODEARC RestroSuite Point of Sale interface. The left sidebar contains navigation options under 'OPERATIONS' (Point of Sale, QR Orders, Kitchen, Floor & Tables, Online Orders, Bills) and 'MANAGE' (Kitchen Setup, Inventory, Menu Editor, Employees, Customers, Tax & GST). The 'Point of Sale' screen shows a 'POS Seating Layout - Select Table' with 14 tables (01-14), each with 4 seats and 'Available' status. The right panel shows an 'Order' screen with a search bar, a table of 14 tables, and an 'Order' summary. The 'Order' summary shows 'Sub ₹0', 'GST ₹0', and 'Total ₹0'. The interface is designed for handling multi-tender and cash denominations.

Desktop web view (1440×900) · orange outline = focus control

Split tender and cash denominations — what every control does

Rule: Every visible button, toggle, field, and chip on this screen is listed below — what it is for, what happens when you use it, and what screen/state comes next. If you can see it, it is covered.

Why this screen exists: Handle multi-tender and exact cash quickly.

WALKTHROUGH (DO THIS IN ORDER)

1. Select Split payment method.
2. Enter amounts per tender; use →₹ / →UPI / →Card / →Due / ½ / clear helpers.
3. For Cash alone: exact (=), ₹100 / 200 / 500 / 2k shortcuts, CLR.
4. Totals must match grand total before Print & Pay enables (when enforced).

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Split method button	Multi tender	Opens split host	Enter per-method amounts
→₹ rest to cash	Fill remainder	Puts leftover on cash	Balanced total
→UPI / →Card / →Due helpers	Fill remainder to that tender	Assigns leftover	Balanced total
½ helper	Half cash half UPI	Splits 50/50	Edit if needed
Clear split	Reset amounts	Zeros split fields	Re-enter
Cash exact (=)	Exact amount	Cash received = total	No change
₹100 / 200 / 500 / 2k buttons	Quick notes	Adds to cash received	Change calculates
CLR denomination	Reset cash input	Clears cash received	Re-enter
Print & Pay	Settle split bill	Saves multi-tender payment	Settled modal

Open / close shift — float and Z-report

Goal: Start and end the day with clear cash discipline.

The screenshot displays the CODEARC RestroSuite Point of Sale interface. A modal titled "Open shift" is centered on the screen, prompting the user to enter opening cash (notes & coins). The modal includes a table for inputting cash values in Indian Rupees (₹) and a "Total" field showing ₹ 0. Below the table is a "Note (optional)" field with the placeholder text "Counted by...". At the bottom of the modal are "Cancel" and "Save" buttons. The background interface shows a sidebar with navigation options like "Point of Sale", "QR Orders", "Kitchen", "Floor & Tables", "Online Orders", "Bills", "Kitchen Setup", "Inventory", "Menu Editor", "Employees", "Customers", "Tax & GST", "Reports", "Settings", "Help", and "Sign out". The main area displays a "POS Seating Layout - Select" section with tables (Table 01, Table 05, Table 09, Table 13) and their status (4 seats, Available). The right side shows an "Order" section with a "Cart is empty" message and a "Total" of ₹ 0.

Opening cash (notes & coins)		
₹500	0	₹0
₹200	0	₹0
₹100	0	₹0
₹50	0	₹0
₹20	0	₹0
₹10	0	₹0
₹5	0	₹0
₹2	0	₹0
Total		₹ 0

Note (optional)

Cancel Save

Desktop web view (1440×900) · orange outline = focus control

Open / close shift — float and Z-report — what every control does

Rule: Every visible button, toggle, field, and chip on this screen is listed below — what it is for, what happens when you use it, and what screen/state comes next. If you can see it, it is covered.

Why this screen exists: Start and end the day with clear cash discipline.

WALKTHROUGH (DO THIS IN ORDER)

1. Top bar Shift: Open shift or Close shift.
2. Open: enter opening cash by denomination (notes & coins) + optional note.
3. All bills on this station tag the open shift.
4. Close: enter counted cash → variance vs expected → Print / CSV Z-report.
5. Preview Z (if shown) before locking the shift.
6. Multi-device: set station label so Z-reports separate counters.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Close shift	End float	Count + variance	Z-report
Z CSV/Print	Audit pack	Downloads/prints	Accounts
Station label	Device name	Tags bills	Filter reports

Floor & Tables — seating map

Goal: See free / dining / held / QR / billed tables at a glance.

The screenshot displays the 'Floor & Tables' interface in the RestroSuite application. The interface is divided into a left sidebar and a main content area.

Left Sidebar:

- CODEARC RestroSuite** logo and navigation icons.
- OPERATIONS** section:
 - Point of Sale
 - QR Orders
 - Kitchen
 - Floor & Tables** (highlighted with an orange border)
 - Online Orders
 - Bills
- MANAGE** section:
 - Kitchen Setup (216)
 - Inventory
 - Menu Editor
 - Employees
 - Customers
 - Tax & GST
- GROW** section:
 - Reports
 - Settings
 - Help
 - Sign out

Main Content Area:

- Counter 1** and **Floor & Tables** header with 'Live table status & seating' subtitle.
- Summary Cards:**
 - Free tables: 14
 - Dining now: 0
 - Awaiting payment: 0
 - Open table value: ₹0
- Legend:** Available (green dot), Dining (orange dot), QR pending (yellow dot), Held (blue dot), Bill printed (purple dot).
- Actions:** Scan table, Open all QR, Close all QR, Clear all open.
- Table Grid:** 14 tables (Table 01 to Table 14) are displayed, all marked as 'Available' with green dots. Each table card shows '4 seats' and 'Tap to seat'.

Desktop web view (1440×900) · orange outline = focus control

Floor & Tables — seating map — what every control does

Rule: Every visible button, toggle, field, and chip on this screen is listed below — what it is for, what happens when you use it, and what screen/state comes next. If you can see it, it is covered.

Why this screen exists: See free / dining / held / QR / billed tables at a glance.

WALKTHROUGH (DO THIS IN ORDER)

1. Open Floor & Tables from the sidebar.
2. KPI cards: free tables, dining now, awaiting payment, open table value.
3. Legend colours: Available, Dining, QR pending, Held, Bill printed.
4. Tap free table → Seat & order → POS bound to that table.
5. Occupied: checkout, transfer, hold, clear/free (confirm carefully).
6. Refresh, Scan table (staff camera), Open all QR / Close all QR, Clear all open.

Edit tables — seats and layout

Goal: Add, rename, or resize tables so the map matches the room.

The screenshot displays the CODEARC RestroSuite interface for managing the dining room layout. The main window shows a floor plan with various tables and their status (Available, Dining, etc.). A modal titled "Manage Seating Layout" is open, allowing users to add, edit, or remove dine-in tables. The modal contains a list of tables with fields for "Table Name/No" and "Seats", and a "Save Layout" button.

Manage Seating Layout
Add, edit or remove dine-in tables

Table Name/No	Seats	
01	4	
02	4	
03	4	
04	4	
05	4	

Background Floor Plan:

- Table 01:** 4 seats, Available, Tap to seat
- Table 05:** 4 seats, Available, Tap to seat
- Table 06:** 4 seats, Available, Tap to seat
- Table 07:** 4 seats, Available, Tap to seat
- Table 11:** 4 seats, Available, Tap to seat
- Table 12:** 4 seats, Available, Tap to seat
- Table 13:** 4 seats, Available, Tap to seat

Buttons: + Add Table, ✓ Save Layout

Print Table QR tents — what every control does

Rule: Every visible button, toggle, field, and chip on this screen is listed below — what it is for, what happens when you use it, and what screen/state comes next. If you can see it, it is covered.

Why this screen exists: Put scannable Order food + Call waiter cards on every table.

WALKTHROUGH (DO THIS IN ORDER)

1. Print Table QRs (or View QR on one table).
2. Choose card size Mini → Full or custom mm.
3. Toggle Wi-Fi name/password, welcome line, Powered by (configure Wi-Fi under Settings → Outlet profile first).
4. Live preview updates as you change options.
5. Print 100% scale (not Fit-to-page). Table number is always printed.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Print Table QRs	Open mass print	Modal with preview	Configure size
Card size presets (Mini...Full)	Fit table stand	Rebuilds card CSS	Live preview
Custom mm size	Exact print size	Custom dimensions	Preview updates
Wi-Fi name/password toggles	Guest connectivity	Shows/hides on card	Set values in Settings profile first
Welcome line toggle	Hospitality text	Shows/hides line	Preview updates
Powered by toggle	Brand line	Shows/hides CodeArc mark	Preview updates
Live preview card	What prints	Display only	Check table number + QR
Print N cards / Print card	Output	Browser print dialog	Print at 100% scale
Cancel	Abort	Closes modal	Floor map

Tips & warnings

- Guests scan with their phone camera — not the staff Scan table button.

Open all QR / Close all QR sessions

Goal: Bulk-control whether guests can place self-orders right now.

Open all QR / Close all QR sessions — what every control does

Rule: Every visible button, toggle, field, and chip on this screen is listed below — what it is for, what happens when you use it, and what screen/state comes next. If you can see it, it is covered.

Why this screen exists: Bulk-control whether guests can place self-orders right now.

WALKTHROUGH (DO THIS IN ORDER)

1. Open all QR — enables guest ordering on every table.
2. Close all QR — stops new guest orders (service-only).
3. Per-table QR state still shows on cards (QR pending badge when guests ordered).
4. Staff Scan table is for staff app camera linking — not guest menus.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Open all QR	Allow guest self-order	Enables QR sessions	Guests scan & order
Close all QR	Stop new guest orders	Disables sessions	Staff-only ordering
Staff Scan table	Staff tool only	Camera to link staff actions	Never for guest menus
Per-table QR state on cards	Visual status	Badge when pending	QR Orders queue

QR Orders queue — accept / reject

Goal: Process orders guests place from table QR codes.

The screenshot displays the RestroSuite QR Orders interface. The sidebar on the left contains navigation options under three main sections: OPERATIONS (Point of Sale, QR Orders, Kitchen, Floor & Tables, Online Orders, Bills), MANAGE (Kitchen Setup, Inventory, Menu Editor, Employees, Customers, Tax & GST), and GROW (Reports, Settings, Help, Sign out). The QR Orders section is highlighted with an orange outline. The main area shows the QR Orders queue with a status bar at the top. The status bar includes four items: Pending accept (0), Preparing (0), Served (0), and Tables occupied (0 / 14). Below the status bar, there is a large white box with the text 'No QR orders right now' and a subtext 'When guests scan a table QR and place an order, it appears here for accept → kitchen → serve.' Below this text are two buttons: 'Open floor' and 'Refresh'. The interface is designed for processing orders from table QR codes.

Desktop web view (1440×900) · orange outline = focus control

QR Orders queue — accept / reject — what every control does

Rule: Every visible button, toggle, field, and chip on this screen is listed below — what it is for, what happens when you use it, and what screen/state comes next. If you can see it, it is covered.

Why this screen exists: Process orders guests place from table QR codes.

WALKTHROUGH (DO THIS IN ORDER)

1. Open QR Orders (sidebar or bottom Orders on mobile).
2. Stats: Pending accept, Preparing, Served, Tables occupied.
3. List / Cards view toggle.
4. Accept → kitchen/KDS; Reject for tests or wrong table.
5. Amend shared table order before cooks start (when enabled).
6. Open floor / Refresh shortcuts.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Accept	Take guest order	To kitchen	KDS ticket
Reject	Decline	Drops ticket	Guest may reorder
List/Cards	View mode	Layout change	Same queue

Tickets appear when staff send a **KOT** from POS, or when a QR order is accepted.

Open POS **Refresh**

Desktop web view (1440×900) · orange outline = focus control

Kitchen Display (KDS) — what every control does

Rule: Every visible button, toggle, field, and chip on this screen is listed below — what it is for, what happens when you use it, and what screen/state comes next. If you can see it, it is covered.

Why this screen exists: Cooks see tickets and mark items ready without paper KOTs.

WALKTHROUGH (DO THIS IN ORDER)

1. Open Kitchen (or dedicated kds.html on a kitchen tablet).
2. Tickets appear from POS KOT, accepted QR orders, or online accepts.
3. Mark preparing → ready; clear when plated.
4. Search order / avg prep chips help during rush.
5. Use a bright tablet, landscape, fixed on the pass.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Ticket card	One order	Shows items	Progress status
Ready / done	Food finished	Advances status	Service
Clear	Remove board	Deletes finished	Clean KDS
Open POS	Jump sell	POS tab	Counter

Tips & warnings

- Kitchen role logins can land directly on KDS.

Kitchen Setup coach (link kitchen tablet)

Goal: Follow the in-app checklist to put a kitchen device on KDS.

Desktop web view (1440×900) · orange outline = focus control

Kitchen Setup coach (link kitchen tablet) — what every control does

Rule: Every visible button, toggle, field, and chip on this screen is listed below — what it is for, what happens when you use it, and what screen/state comes next. If you can see it, it is covered.

Why this screen exists: Follow the in-app checklist to put a kitchen device on KDS.

WALKTHROUGH (DO THIS IN ORDER)

1. Open Kitchen Setup from sidebar coach / More (wording: Kitchen Setup).
2. Follow checklist: open kitchen URL or role login, network, full-screen, sound if offered.
3. Confirm tickets appear when POS sends KOT.
4. Close coach when done — it does not replace the Kitchen tab itself.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Kitchen Setup coach	Device checklist	Opens guided steps	Kitchen tablet ready
Open Kitchen URL / role login	Dedicated device	Loads KDS	Tickets appear

Online Orders queue

Goal: One place for delivery-channel and manual online tickets.

The screenshot displays the CODEARC RestroSuite interface for managing online orders. The sidebar on the left contains navigation options under three main categories: OPERATIONS (Point of Sale, QR Orders, Kitchen, Floor & Tables, Online Orders, Bills), MANAGE (Kitchen Setup, Inventory, Menu Editor, Employees, Customers, Tax & GST), and GROW (Reports, Settings, Help, Sign out). The main area is titled 'Online Orders' and shows a status of 'New orders'. A message indicates 'Kitchen is clear for delivery' and provides instructions for manual entry or webhook setup. A list of orders is displayed below, with columns for platform, status, and time. The interface is designed for a desktop web view (1440x900) and includes a focus control orange outline around the main content area.

Desktop web view (1440×900) · orange outline = focus control

Online Orders queue — what every control does

Rule: Every visible button, toggle, field, and chip on this screen is listed below — what it is for, what happens when you use it, and what screen/state comes next. If you can see it, it is covered.

Why this screen exists: One place for delivery-channel and manual online tickets.

WALKTHROUGH (DO THIS IN ORDER)

1. Open Online Orders from sidebar.
2. Review items, customer, and channel.
3. Accept (to kitchen) or Reject.
4. Phone orders: create manual online order when the button exists, then process like POS/online flow.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Accept	Take order	Kitchen/billing	Fulfil
Reject	Cannot fulfil	Declines	Channel notified if linked
Manual online	Phone order	Creates ticket	Same flow

Menu Editor — add item, price, GST slab — what every control does

Rule: Every visible button, toggle, field, and chip on this screen is listed below — what it is for, what happens when you use it, and what screen/state comes next. If you can see it, it is covered.

Why this screen exists: Publish what POS and guest QR both sell.

WALKTHROUGH (DO THIS IN ORDER)

1. Open Menu Editor.
2. Add new item: English name, optional Hindi name (QR), price, category.
3. Type Veg/Non-veg, GST slab (0/5/12/18...), Sold as plate/etc., recipe servings.
4. Flags: Best seller, Today's special, Staple, Offer water.
5. Add-ons (extra ghee...), Uses from store (recipe qty).
6. Save — item appears on POS after sync/refresh.
7. Toggle Available off for sold-out.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Add item fields	New sellable	Fills form	Save
GST slab	Item tax	Sets taxCategory	POS tax uses it
Available toggle	Sold-out	Hides from POS	Re-enable later
Save	Publish	Writes menu	POS/QR update

Tips & warnings

- India: most restaurant food often 5%; packaged drinks may be higher — confirm with your CA.

Menu import / export / enable all

Employees — Logins (credentials & access)

Goal: Reset passwords and review login access without recreating staff.

The screenshot displays the 'Employee Ledger' interface for 'Counter 1'. The left sidebar contains navigation options under 'OPERATIONS' (Point of Sale, QR Orders, Kitchen, Floor & Tables, Online Orders, Bills) and 'MANAGE' (Kitchen Setup, Inventory, Menu Editor, Employees, Customers, Tax & GST). The 'Employees' option is highlighted. The main area shows the 'Logins' tab selected, displaying a table of 'Staff Login Accounts'. The table lists 8 accounts, all with a 'suspended' status. Each account row includes a 'NAME', 'USERNAME', 'ROLE', 'STATUS', 'LAST LOGIN', and a set of action icons (edit, key, checkmark, and user icon). The interface also features a top navigation bar with a search bar, a 'Shift' button, and a bottom status bar with a 'v209' version indicator.

Staff Login Accounts
0 of 5 accounts used

NAME	USERNAME	ROLE	STATUS	LAST LOGIN	
Test cashier	test_cashier	Cashier	suspended	27 Jun 2026, 3:35 pm

Growth Hub — Purchase Orders

Goal: Raise supplier POs from Growth Hub (pairs with Inventory → PO).

The screenshot displays the RestroSuite Growth Hub interface. The left sidebar contains navigation options: Kitchen, Floor & Tables, Online Orders, Bills, Kitchen Setup (216), Inventory (selected), Menu Editor, Employees, Customers, Tax & GST, Reports, Analytics, Growth Hub, Settings, Help, and Sign out. The main content area is titled 'Inventory' and shows 'Stock levels, batch expiry & ordering th...'. It includes tabs for Stock levels, Recipes, Suppliers, Purchase orders (selected), and Waste log. A notification bar states: 'Next: 216 dishes still need a recipe so sales reduce stock.' with links for 'Help me link', '3-step setup', and 'Open Recipes'. Another notification bar states: '63 stock items have no unit cost (₹0). Link a cost so recipes can show plate cost & margin. Stock value so far: ₹0.' with buttons for 'Set costs' and 'Show ₹0 only'. The 'Purchase orders' section shows '0 open' orders and filters for Open, Received, Cancelled, and All. A table header lists columns: PO NO., SUPPLIER, ITEMS, VALUE, DATE, STATUS, and ACTIONS. Below the table, it says: 'No purchase orders yet. Use Auto-draft POs on Stock when items are low, or Raise PO.' and a '+ Raise PO' button. A bottom button says 'Opening purchase orders'.

support@codearc.co.in

Settings → Printers & KOT — what every control does

Rule: Every visible button, toggle, field, and chip on this screen is listed below — what it is for, what happens when you use it, and what screen/state comes next. If you can see it, it is covered.

Why this screen exists: Paper receipts, auto-print, kitchen tickets, cash drawer.

WALKTHROUGH (DO THIS IN ORDER)

1. Preferred printer name / USB thermal bridge when using desktop or Android print.
2. Auto-print bill / auto KOT toggles.
3. Paper width (58/80mm) when offered.
4. Cash drawer pulse after cash sale if hardware supports it.
5. Test print before service.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Printer name / device	Which printer	Routes ESC/POS or system print	Paper out
Paper width 58/80mm	Match roll	Formats receipt	Correct cut
Auto-print bill toggle	Speed on settle	Prints without prompt	Rush friendly
Auto KOT toggle	Kitchen speed	Prints KOT on send	Cooks get paper too
Cash drawer toggle	Open till on cash	Pulse drawer	Cash sales
Test print	Verify hardware	Sends sample	Fix driver if fail
Save	Persist print policy	Writes settings	Next bill uses it

Tips & warnings

- Mobile/PWA printing may use browser print or companion bridge — see docs/MOBILE_PRINTING.md in repo for staff IT.

Settings → WhatsApp gateway

Goal: Connect restaurant WhatsApp so bills and campaigns can send.

The screenshot shows the RestroSuite web interface. On the left is a sidebar with navigation options: Kitchen, Floor & Tables, Online Orders, Bills, Kitchen Setup (highlighted with an orange border and a red '216' badge), Inventory, Menu Editor, Employees, Customers, Tax & GST, Reports, Analytics, Growth Hub, Settings, Help, and Sign out. The main content area is titled 'Settings' for 'Counter 1' and lists various configuration categories: OUTLET (Outlet profile, Taxes & pricing), OPERATIONS (Printers & KOT, WhatsApp (highlighted with an orange border), Payments), ACCESS (Security & PIN, Team & roles), and ACCOUNT (Plan & billing, Danger zone). The 'WhatsApp' section is expanded, showing options to connect the restaurant's WhatsApp number. It includes a 'Connection' section with an 'Automation' toggle set to 'Platform', a 'Link my WhatsApp' button, and buttons for 'Send test', 'Refresh', and 'New QR'. Below this is the 'Bill preferences' section, which includes a 'Send bill after payment' toggle (turned on) and a 'Bill format' section. At the bottom, a status message says 'Connection is live · preferences save with the button', with 'Discard' and 'Save changes' buttons.

Settings → Team & roles — what every control does

Rule: Every visible button, toggle, field, and chip on this screen is listed below — what it is for, what happens when you use it, and what screen/state comes next. If you can see it, it is covered.

Why this screen exists: Policy for staff permissions beyond individual Employees records.

WALKTHROUGH (DO THIS IN ORDER)

1. Review role templates / cashier restrictions.
2. Align with Employees → Logins for who can open Settings, Reports, Inventory.
3. Managers may open a subset of Settings; owners see Plan & Danger zone.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Role templates / cashier restrictions	Default powers	Saves policy	New staff inherit limits
Who may open Settings/Reports/Inventory	Least privilege	Toggles access	Align with Employees roles
Save	Persist team policy	Writes settings	Next login respects

Settings → Plan & billing

Goal: See workspace plan, limits, and upgrade path.

End-of-day checklist — what every control does

Rule: Every visible button, toggle, field, and chip on this screen is listed below — what it is for, what happens when you use it, and what screen/state comes next. If you can see it, it is covered.

Why this screen exists: Leave the till clean for tomorrow.

WALKTHROUGH (DO THIS IN ORDER)

1. Close open shifts on each station (cash count + Z-report).
2. Reports → Today → match totals to cash + UPI + card.
3. Bills Excel/CSV export if accountant wants daily pack.
4. Download GSTR-ready CSV if month-end.
5. Close all QR if dining room is shut.
6. Sign out on shared tablets; keep one owner device if needed overnight.

Close shift	Cash discipline	Z-report	Tomorrow float
Reports Today	Reconcile	Match drawer	Accounts trust
Exports	Handoff	CSV/Excel	CA
Sign out shared devices	Security	Clears session	Login screen

Offline billing and reconnect

Goal: Keep selling when internet drops; sync when back online.

The screenshot displays the CODEARC RestroSuite Point of Sale (POS) interface. The left sidebar contains navigation options under 'OPERATIONS' (Point of Sale, QR Orders, Kitchen, Floor & Tables, Online Orders, Bills) and 'MANAGE' (Kitchen Setup, Inventory, Menu Editor, Employees, Customers, Tax & GST). The main area shows a 'POS Seating Layout - Select Table' grid with 14 tables (01-14), each with 4 seats and 'Available' status. A search bar at the top allows searching for menu or item codes. The right-hand panel shows an 'Order' screen with a search bar, a table for adding details (Name, IN +91, 10-digit mobile), and a 'Cart is empty' message. The bottom of the screen shows a summary: Sub ₹0, GST ₹0, and Total ₹0.

Desktop web view (1440×900) · orange outline = focus control

Offline billing and reconnect — what every control does

Rule: Every visible button, toggle, field, and chip on this screen is listed below — what it is for, what happens when you use it, and what screen/state comes next. If you can see it, it is covered.

Why this screen exists: Keep selling when internet drops; sync when back online.

WALKTHROUGH (DO THIS IN ORDER)

1. RestroSuite is offline-first — POS can still bill on a device with a valid session/lease.
2. When offline, logout may be locked to prevent lock-out.
3. Bills queue locally then sync when network returns.
4. If a licence/reconnect screen appears, use Retry / Reconnect and wait for lease.
5. WhatsApp and cloud exports need network; paper print may still work.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Continue POS offline	No internet	Local bills	Sync later
Retry / Reconnect	Lease/network	Restores cloud	WA works again

Tips & warnings

- Tell support: Outlet ID, device, version chip, online/offline when the issue happened.

Help, demo checklist, and support

Goal: Get unstuck without guessing.

The screenshot shows a desktop web view of the RestroSuite application. A 'Workspace Guide' overlay is centered on the screen, providing a checklist for launching the system. The background shows the application's sidebar with sections like OPERATIONS, MANAGE, and GROW. The 'Point of Sale' feature is highlighted in the sidebar. The 'Workspace Guide' overlay has a title bar with 'What's new' and 'Tour' buttons. It lists tasks with progress indicators and estimated completion times. The 'Add staff & roles' task is highlighted with an orange outline, indicating it is the current focus. The 'Need help?' section at the bottom provides contact information for support.
